Profile

Beccy is a highly skilled case manager with over 12 years' experience and 4 years' experience as a care expert. She has a solid reputation amongst referrers and clients alike, due to her efficiency, empathy, and approachability. After qualifying as a physiotherapist in 2004, she worked in a variety of settings within the NHS, military services, and private practice. She is proficient in treating complex conditions and managing clients with combined physical and psychological conditions.

Beccy has worked as a case manager in the UK since 2009 and specialises in working with adults with acquired brain injury, complex orthopaedic injury, and amputation. Prior to this, she worked in Vancouver, Canada where she focused on managing clients injured at work and in road traffic accidents through insurance claims. She gained significant experience in vocational rehabilitation, which included functional capacity evaluations, work site visits, job demand analyses and return to work planning. She was also involved in gradually integrating clients back into the workplace, often in new and adapted roles. Beccy is experienced in addressing the psychological factors that are associated with long-term injuries and the complexities of chronic pain. She frequently works with clients who need large support teams and is competent in the recruitment, coordination, and ongoing management of care staff. Beccy is renowned for her report writing skills and has excellent knowledge of the litigation process due to her work as an expert witness. She has provided testimony in court.
